CHARAN KUMAR N

O B J E C T I V E

Second-year B.Tech AI & Data Science student with strong Python and web development skills, seeking an internship to contribute to scalable, real-world engineering solutions. Experienced with Git and MySQL, and comfortable working on end-to-end development and data-driven projects. Eager to learn from industry mentors while delivering high-quality, impact-focused work.

Self-Learning & Academic Projects

- Built a full-stack web application using HTML, CSS, JavaScript, Python, and MySQL.
- Designed and implemented backend logic in Python for handling user data and application workflows.
- Created and managed relational databases using MySQL for efficient data storage and retrieval.
- Used Git and GitHub for version control, code management, and tracking project progress.
- Practiced debugging, testing, and improving application performance through iterative development

Working On New Project

VITALWATCH — Pre-Fatal Risk Window Prediction System

- Developing an AI-driven system to analyze health-related data and identify early risk patterns before critical events.
- Working on data collection, preprocessing, and feature engineering using Python.
- Designing predictive logic to estimate risk windows based on input health parameters.
- Building a web-based interface using HTML, CSS, and JavaScript to visualize risk indicators.
- Using MySQL to store patient data and prediction outputs securely.
- Managing source code and project versions using Git and GitHub.
- Actively researching ML models and healthcare datasets to improve prediction accuracy.

S K I L L S

- Frontend Development (HTML, CSS, JavaScript)
- SQL (MySQL)
- Python (Flask)
- MongoDB
- Git & GitHub
- Data Analysis
- C, DSA
- Power BI

T O O L S

- Visual Studio Code
- MySQL Workbench
- MS Word, Excel
- Canva

L A N G U A G E S

- English
- Kannada
- Tamil
- Telugu
